Management of Children's Toileting Issues

The staff and Governors of this school recognise their responsibility for the Health, Safety and welfare of the children in our care.

Our expectation is that young children should have achieved continence when they are admitted to school.

- We recognise that young children vary widely in their levels of maturity and in achieving continence.
- We also recognise that children may have a lapse in their continence because of trauma, onset of sudden disability, emotional upset or health problems.
- We will do our best to support children in partnership with parents, but the school does need the support of parents if children need a change of clothing or they have become distressed.
- In some circumstances we may need, and will reserve the right, to contact parents and request that the child should be collected from school.

What the school expects of parents:

- Parents will complete the pre-admission 'Teddy' sheet which includes toileting; see attached
- Parents will endeavour to ensure that their child is continent before admission to school (unless the child has additional needs).
- Parents will discuss any specific concerns with staff about their child's toileting needs
- Parents accept that on occasions their child may need to be collected from school and will ensure that they are contactable.

What parents expect of our school:

- Where children are not toilet trained on admission to school, staff will work in partnership with parents, and the school nurse if appropriate, in implementing a toileting programme.
- Staff will deal sensitively with all children's toileting needs
- Staff will encourage children to become independent and confident in coping with their own toileting needs
- Staff will contact parents if their child becomes distressed or is unwell in order that he/she can be collected from school.
