

FOUR OPERATIONS - LENGTH

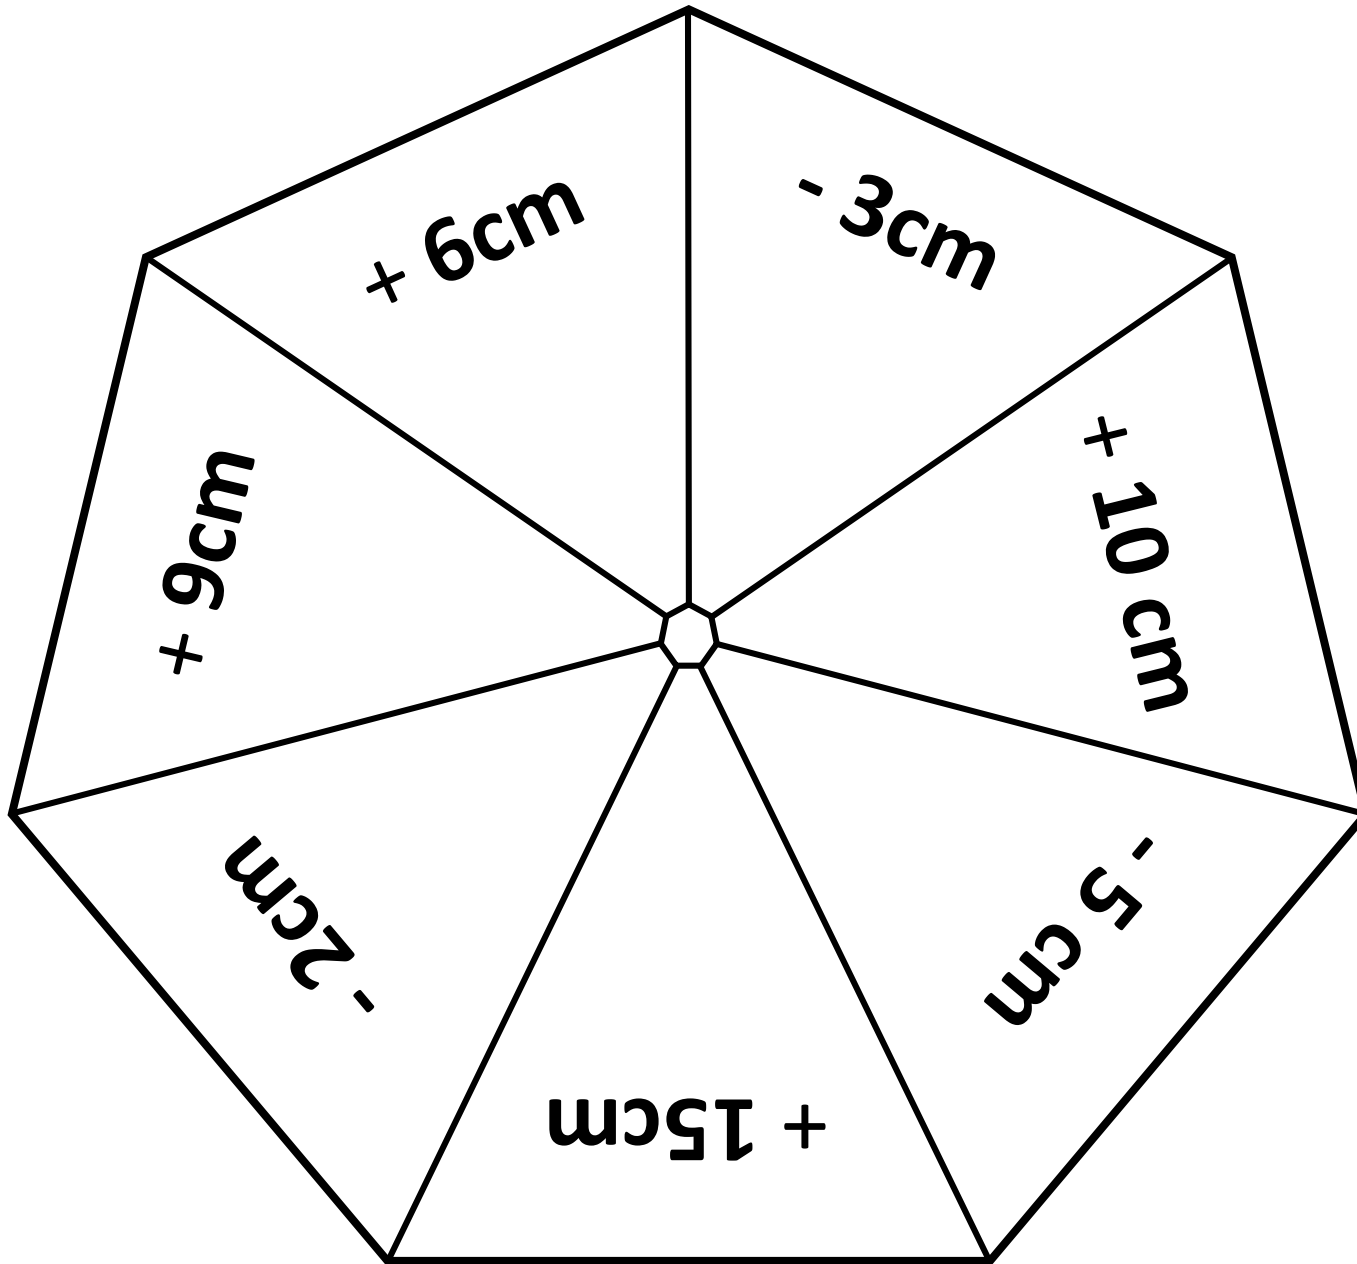

SPINNER 1

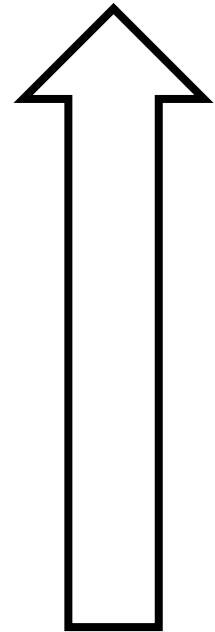

Cut the spinner out
and attach the arrow
using a split pin.

SPINNER 1

Cut the spinner out and attach the arrow using a split pin.

Four operations - Length

Game board 1 – Numbers up to 100 (multiples of 5 only)

Game board 2 – Numbers up to 100

Instructions

- 1) Player 1 will spin the first spinner to determine how spaces to move. Move your counter to that space.
- 2) Spin the second spinner and complete the calculation.
(For example, if you land on 3cm and the spinner says +6cm you must work out $3\text{cm}+6\text{cm}$).
Only your first answer will be accepted, you cannot change your mind!
- 3) If correct, you will stay on that spot. If you are incorrect you must go back to your previous spot.

The winner is the first player to land on Finish!

Note: You do not need to complete a calculation at the finish spot.
